

# 100 DAYS UNTIL HURRICANE SEASON

## 3 Tips to Prepare for Hurricane Season

### CREATE A HOME INVENTORY & REVIEW INSURANCE

Consider putting together a detailed list of your belongings or create a video to make filing an insurance claim easier.

### REVIEW ROOF

Call in the pros to determine if you need a new roof or major repairs.

- If you need to replace your roof, ask your roofer to follow the resilient FORTIFIED Roof standards to ensure it will withstand high winds and heavy rains.
- If only repairs are needed, secure loose shingles and soffits to keep water out of your home.

### SEAL GAPS & CRACKS

Pick up a tube of silicone caulk to repair any gaps or cracks that might let water into your home. Check all exterior walls and around windows, doors, electrical boxes, vents and pipes.
